I/CM Requirement on [REDACTED] Defector

25X1X6

REF : 25X1A2a  
[REDACTED] 13 Jan 59. 3.

### Background

a. There have been numerous unconfirmed reports that the Soviet Union has placed guided missile launch sites in Hungary and the other European Satellites. It is believed that the Soviet Union has a current capability of supplying the shorter range missiles to one or more of these countries. Therefore, any information concerning the existence of missile launch sites or missile storage depots in Hungary, their location or planned location as evidenced by initial support construction in an area, is of great intelligence value.

b. It is believed that Soviet missile deployment in the Satellites may be by means of a mobile system. It is very likely that such a system would involve the construction of reinforced roads, railroads or railroad spurs into relatively remote or wooded areas, and that it would also involve increased communications activity. This would apply also, to some extent in the construction of a fixed launch installation. It is possible that [REDACTED]

### Requirements

a. It is requested that the source be interrogated for the following information:

1. The construction or planned construction of buildings for the Ministry of Communications in remote areas, and/or which were to be a part of an unidentified

or classified activity or military complex. The location, date, purpose and description of any such buildings and any participating governmental components or military services should be ascertained, as well as any unusual construction requirements.

25X1X6

2. The same information as in (1.) concerning buildings for the [REDACTED]

3. Any indications that roads, railroads or spurs were to be built in remote or wooded areas, or that any stretches of road were to be heavily reinforced with concrete for an unknown or no apparent reason.

4. Any participation of or control exercised by Soviet civilian or military personnel in the KOZEPTEV or UVATERV enterprises, and the extent of this participation. Source should be asked in what activities were these enterprises involved.

[REDACTED]  
such or the type of personnel involved should be reported.

6. Any knowledge source may have concerning air defense operations and capabilities in Hungary which would indicate any intent to employ surface-to-air or air-to-air missiles.

7. The reason for the merger of communications and road and railroad construction enterprises in November 1953.

8. Any rumors obtained from Hungarian citizens or Soviet personnel concerning construction of missile launch sites or storage depots, or the use of any type of missiles

configuration? If so, describe in detail. Were these cars Hungarian or were they Soviet? Were they part of a military convoy? Were they seen in conjunction with fuel tank cars with frosted valves and fittings? Where and when were the cars seen? Were there any unusual markings? Describe. Were Hungarian and/or Soviet troops present or guarding the cars?
